

## Career Opportunities Within Multiple Product Service Lines:

**Artificial Lift** provides state-of-the-art downhole pumping systems that add energy to the wellbore fluid column. This process helps to increase the natural reservoir production rate of the well and to maximize recovery.

**Baroid** provides drilling fluid systems, performance additives, solids control, and waste management services for oil and gas drilling, completion, and workover operations.

**Cementing** is our foundational business, and Halliburton remains the market-share leader. Customers depend on Halliburton cementing services to support and protect casing, isolate pay zones, and ensure wellbore stability.

**Completion Tools** provides reliable downhole solutions and services to help customers complete their wells economically and efficiently.

**Consulting & Project Management** helps customers optimize the value of their oil and gas assets by using industry best practices, methodologies, technologies, expertise, and project management capabilities to solve the most complex reservoir challenges.

**Drill Bits & Services** manufactures state-of-the-art drill bits and technologies, backed by comprehensive expert support, that are engineered to shorten drilling time and improve operational efficiency.

**Landmark Software & Services** provides technology deployment and hosting services, a petro-technical computing portfolio, software training, and customer support to help customers realize the maximum return on their technology investments by improving insight from data across the exploration and production life cycle.

**Multi-Chem** offers customized specialty chemicals and applications to oil and gas companies to address issues such as flow assurance, enhanced gas recovery, fracturing technology, and pipeline treatments.

**Pipeline & Process Services** provides a full range of onshore and offshore services – precommissioning,

commissioning, maintenance, and decommissioning – to the pipeline and process plant construction, commissioning, and maintenance industries.

**Production Enhancement** offers solutions that safely and efficiently boost production and tap complex resources to achieve optimum performance.

**Production Solutions** provides customized intervention solutions to maximize production efficiency and ultimate recovery – in deep water, unconventional assets, or mature fields. Using custom chemistries and tools, we diagnose field productivity issues and design immediate-impact solutions.

**Sperry Drilling** provides innovative technologies and services for directional drilling and formation evaluation while drilling, using real-time solutions to help customers tap remote reserves and optimize wellbore placement.

**Testing & Subsea** offers integrated testing and sampling capabilities, with reliable products and services that are focused on acquisition and analysis of dynamic reservoir information and reservoir optimization solutions.

**Wireline & Perforating** interprets data on geological formations gathered from the wellsite. Its services also include perforating, which is the use of explosives to provide maximum well and reservoir productivity.

## HALLIBURTON

# What is Halliburton?

Halliburton is one of the world's leading providers of products and services to the upstream energy industry.

Halliburton is proud to be a services company, and our customers and investors appreciate our business model. Our strong competitive position not only comes from our geographic footprint and wide range of products and services, but also, more importantly, from the quality of our work and the dedication of our employees.

With more than 50,000 employees in approximately 70 countries, Halliburton touches much of the oil and gas that fuel our society.

## Our Values

**Integrity:** Ethics and integrity are the foundation of our brand and the guiding principles for all we do.

**Safety:** Priority number one. We are focused on our own personal safety, as well as on the safety of others.

**Collaboration:** We work together with customers, and understand that everyone has a role in providing the best solution.

**Competition:** We compete to win, knowing that competition makes everyone stronger.

**Creativity:** We are resourceful. We are innovative, and strive to apply the right technology and solution every time.

**Reliability:** We deliver what we promise. We believe the quality of our service defines who we are.

**Respect:** We are honest with ourselves and with each other. We value our diverse skills and talents, and know we are stronger together as one family.

These values are our corporate DNA, the foundation for how we relate to each other and to every individual and entity with whom we interact. These are the principles that every Halliburton employee is expected to use, live by, and demonstrate on a daily basis.

## Own Your Career

Our people are essential to our ability to innovate, achieve, grow, and lead. We attract and retain the best talent by investing in our employees and empowering them to develop themselves and their careers. We invest in our employees through leadership and competency development, competitive compensation plans, health benefits, work-life programs, and reward and incentive plans.

Opportunities for career development – and the tools you need to take advantage of them – are abundant. Combine those opportunities with your drive and capabilities, and your career path can go in nearly any direction you choose.
