

Environmental Field Tech/Source Tester – Helena, MT

Bison Engineering, Inc., is a Montana-based, employee-owned environmental engineering firm with 35 years of experience in helping our clients comply with air quality regulations. We specialize in air quality permitting, emissions testing, ambient air monitoring, and gas flow monitor design and manufacture. We are looking for a source tester in our Helena office.

A two-year associates degree or four-year degree is preferred, but candidates with sufficient experience will be considered. Technical requirements for the position include the ability to learn how to operate, maintain, and repair testing equipment; and proficiency in algebra, MS Word, and Excel. Applicants should possess strong written and verbal communication skills, as well as the ability to work independently and on teams. This challenging position will include regional travel and the nature of the work can be physically demanding, while performed in outdoor and industrial settings, and often at elevated heights. A commitment to workplace safety is essential and employees will be subject to drug and alcohol testing.

Bison offers a competitive salary and a full benefits package including a 401k retirement plan and bonuses based on performance. Please email your resume to humanresources@bison-eng.com.
